- Service

Using ...

Voice, data, alarms, video, images, analogue or digital radio, satellite, GSM, GPRS, UMTS, WLAN, IP, fiber optic, ...

# European Corporation

WORLDWIDE SERVICE

*Zenitel is an independent European system integrator serving a global customer base.*

*Our expertise centers design new systems for customers all around the world.*

*Implementation and integration are performed on your premises, wherever they may*

*be. After project completion, our service task force makes sure that all your*

*communication systems remain fully operational 24/7.*

# More than 100 years ...

Zenitel has more than 100 years of unique expertise and experience. Our vast portfolio of successful projects and references worldwide in a huge variety of application domains is the best proof of our quality and technology.

## To go ...

Zenitel is future oriented. Our expanded program of R&D investment ensures that we will be able to continuously innovate our technology base. We are utterly committed to expanding our offerings and expertise.

# Total Solutions

FOR RELIABLE COMMUNICATIONS

*Whether you are looking for a reliable link in a highly secure infrastructure or a comprehensive and fast communications system that covers a multitude of media, what you need most is a complete answer. Zenitel offers a total solution, exceeding your expectations.*

## Custom-made and reliable

Zenitel designs and builds both subsystems and total infrastructure for a variety of critical communications and application domains. Our main focus is on providing the right answer for the right customer. Delivering absolutely reliable solutions is our primary goal. The fact that we service your infrastructure throughout its entire life cycle is our best proof of quality.

## Based on the most suitable technology

Your solution is an optimal combination of standard components integrated into a totally reliable communication environment. As an independent technology provider, we can always choose the best technologies and subsystems. When needed, our research specialists develop specific high-tech components. In short, there is no system we cannot design.

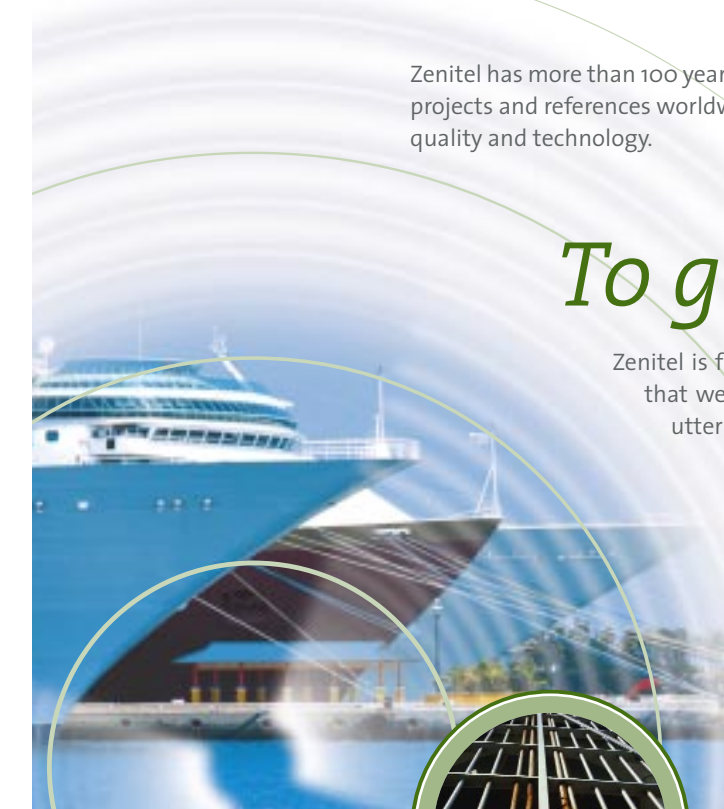

## Advanced expertise

Our expertise centers are located all over the world, and are able to attract top engineers. Each of the centers is geared to find better and more reliable solutions for your specific demands. Functional and system analysts, IT experts, electronics and wireless communication specialists, project and system engineers, ... whatever your project requires, you will find all the required skills and expertise at Zenitel.

## Total care

We are prepared to take the final responsibility for your solution. And we even go one step further. We guarantee the full operability of your infrastructure, now, tomorrow and over the years with strict service level agreements and total care contracts. Even though you may only need a short-term solution now, you can count on the fact that we are prepared to become your long-term total solution partner.
