

"The objective for building managers is to maintain an energy-efficient, secure environment for all occupants -- protecting them against unauthorized access, fire and disturbance while providing immediate security and emergency response when necessary. Our communication systems integrate with access control, CCTV and alarm systems to provide end users with a complete and effective security package."

DanRothrock, President, Zenitel USA

Siemens

Federal Reserve

Cleveland, OH

The Federal Reserve in Cleveland has used STENTOFON® for its security communications for years, updating a TouchLine system with AlphaCom. The system is integrated with access control with stations located at door entrances and passageways. Cleveland is headquarters of the Fourth Federal Reserve District, which comprises Ohio, western Pennsylvania, eastern Kentucky, and the northern panhandle of West Virginia.

Lucent Technologies Inc.

Norcross, VA

The Lucent fiber optics plant designs, builds and delivers networks and communication systems and software. Lucent recently invested an additional \$150 million in its optical fiber manufacturing plant in Norcross. The plant utilizes a STENTOFON® AlphaCom system for parking security and gate entry. AlphaCom is interfaced with access control and CCTV for a comprehensive security system.

Midway Airport

Chicago, IL

One of the fastest growing airports, Chicago Midway serves over 17 million travelers yearly. Chicago Midway has three concourses serving major airlines including American, Continental and Southwest. The airport uses STENTOFON® tamper/weather resistant stations with blue strobe lights located throughout its parking areas. Stations are also positioned within the terminals for internal security communications.

MARTA - Metropolitan Atlanta Transit Authority

Atlanta, GA

The Metro Atlanta Rapid Transit Authority (MARTA) provides bus and rail service in the Midtown neighborhood of Atlanta. Marta utilizes STENTOFON® for its Lenox Square Rail Station. The AlphaCom system is used in parking garages and is integrated with CCTV -- providing a safe and secure environment for people parking their vehicles and taking trains into downtown.

BellSouth

Atlanta, GA

BellSouth Corporation, a Fortune 100 communications services company headquartered in Atlanta, GA, provides an array of broadband data and e-commerce solutions to business customers, including Web hosting and other Internet services. BellSouth uses STENTOFON® for parking security in several building locations throughout Atlanta. All systems are interfaced with access control and CCTV.
