

STENTOFON 1764 Ceiling Speaker

Features

- Paging & Talkback Speaker
- Enhanced Sound Monitoring
- Wide Frequency Response
- Heavy Duty Construction
- Unobtrusive Appearance
- Easy to Install

Functional Description

The 1764 is a high quality 4" speaker designed as a ceiling mounted paging and intercom speaker. It is a rugged, all metal constructed, full range speaker and baffle. The 4" size speaker takes less ceiling space and provides better sound dispersion than an 8" speaker. It appears as a standard paging speaker, and can provide clear two-way intercom. The 1764 will operate on various STENTOFON intercom systems.
