

## 9453 to 9400 Standard

Two 9453D LCD masters can connect up to 3 of the 9400 intercom modules for a system of 400 substations. Each master would have it's own audio channel. The calls can come to a specific 9453 or to both in parallel. In that case when one answers a call the call request is removed from the display of the other one.

- \*Support up to 297 substations.
- \*Substations can be 45 ohm type with or without LED.
- \*Line monitoring on wire to substations.
