

## STENTOFON 96257 Tamper Resistant

### Features

- Instant Contact. . .In Seconds
- Large Red “Mushroom” Button
- Rugged .25” Machined Metal
- No-Penetration Speaker Grill
- Clear, Crisp Sound Quality
- Weather Resistant Components
- Allows Line Supervision

### Functional Description

The #96257 is a rugged, weather and tamper resistant substation with a large red call-in button that is easily pressed by an elbow or shoulder. Call-in can be an emergency call to a 9200/9600 Control Room Master. The station has a unique design to protect the speaker and internal electronics from external abuse and a harsh environment. The station is extremely rugged and provides excellent sensitivity and voice reproduction. The #96257 is ideal for security applications in parking garages, stairwells, entry doors, gates and police stations. The #96257 operates with the 9200, 9400 and 9600 systems.

### Technical Specifications

Faceplate:	.25” machined, anodized, brushed aluminum, moisture gasket
Dimensions:	5.5” H x 7.5” W x 2.5” D
Speaker:	3” square, 45 ohm, 1 watt water proof
Push Button:	Large, red, 1.25” round, machined aluminum, mechanical push button
Protection:	Metal off-set speaker grill. Electronics and switch are encapsulated
Options:	LED call placed, or call connect, indicator is a system option
Connector:	(4) 10” Pigtails
Cabling:	Requires (1) twisted pair #22 AWG to MDF (Plus (2nd) pair for optional LED) (Loop resistance not to exceed 100 ohm)
Mounting:	Flush mount on #6297 box, surface mount on #6298 box (interior) #6299 (exterior) box. (mounting screws not provided)

**Note:** For extreme weather and environmental conditions, contact Zenitel for optional solutions.
