

STENTOFON 9626 Ceiling Substation

Features

- Enhanced Sound Monitoring
- Wide Frequency Response
- Heavy Duty Construction
- Unobtrusive Appearance
- Easy to Install
- Clear Two-Way Communication

Functional Description

The #9626 is a high quality 4" speaker designed as a ceiling mounted intercom substation. It is a rugged, all metal constructed, full range speaker complete with a baffle and necessary electronics. The 4" size speaker acts as a microphone, takes less ceiling space and provides better sound dispersion than an 8" speaker. It appears as a standard paging speaker, and provides clear two-way intercom from a #9600 master station. The #9626 operates with the 9200, 9400 and 9600 systems.

Technical Specification

Baffle:	Round, 22 ga. steel, hidden mounting studs
Finish:	Zinc coated, finished in white baked epoxy
Size:	7 7/8" , 3 1/2" deep
Speaker:	4", capable of 3 watt output, 45 ohm
Frequency:	180 Hz - 9 Khz. Sensitivity 93 db
Magnet:	1 oz., barium ferrite ceramic
Connectors:	Screw Terminals
Cabling:	(1) pair twisted #22 AWG from system MDF
Mounting:	Use #1830 backbox and #1831 ceiling bridge
