Description

This master station is designed for flush in a console and a back box is available for this purpose.

The station is a fully equipped master station with free access to all extensions and features. The station includes programmable single touch keys, a goose-neck microphone and a 2 x 16 character alphanumeric display providing caller identification, on-line help and a directory service amongst other features. The noise cancelling goose-neck microphone makes the station ideal for conference and announcements applications.

A Modular Jack plug on the station end gives quick and easy connection to the station’s circuit board. 2-pair twisted telephone cable is required between the exchange and the station.

The station is equipped a 63 Ohm / 1 W loudspeaker. The loudspeaker volume is easily adjustable with a screw-driver using the potentiometer located on the outside of the front plate.
